DIAL-A-MITER

You dial the pipe size and Dial-A-Miter tells you all you need to know to make both long and short radius 90 degree weld ells from 1" to 30" inclusive (such as throat and heel measurements, angle of cut and number of miters required for each ell). Dial-A-Miter is made of sturdy, soil resistant cardboard, with a lustrous satin gloss PLASTICIZED surface. It can be renewed to its original beauty by wiping clean with a damp cloth. Being 3 1/2" wide and 5" long, it fits conveniently in your pocket.
